## **QUAD PULSE PACKAGE I**

## **ADVANTAGES**

- Bag-In/Bag-Out safe-change for filters and dust discharge
- Integrated explosion protection (ATEX certified/NFPA compliant)
- Easy installation
- High-Vacuum applications
- 1 filter cartridge, air volume up to 1,200 m³/h (706 cfm)
- Online pulse cleaning without interrupting operations
- Long filter life

1 0 0,
Min Temperature (°C) -20
As space on the production floor is limited, the dust collectors of Quad Pulse Package Series convince with their compact and spatial saving design. Thanks to the integrated explosion protection not additional equipment is needed so that this plug-and-play units be installed indoors without any limitations. Easy access for all maintenance functions.

Compact and strong unit construction incorporates a unique HEPA filter design, with specialized materials from the aerospace industry, providing the following key advantages:

- \* The Quad Pulse Package HEPA filter captures the fine dust particles and is a tested flame and contamination barrier.
- \* Additional, expensive explosion safety devices are not required.
- \* The pressure resistant housing maintains its integrity with no damage during an explosion event.
- \* Compact unit with flexibility for indoor installation reduces the need for long duct runs.
